MAJOR CLASSIFICATION INDEX OF ARTICLES

ANALYTICAL METHODS

Combined CBD-MAGIC method for determination of P associated with sedimentary Fe oxyhydroxides 2108–2115
Rapid and precise procedure for Pb isotopes in blood 807–813
Rapid determination of chemical and physical properties in marine sediments 1637–1647
Stable isotope composition of CO_2 from cores of argillites 713–725

Data handling

Comparison between heavy metal concentrations in sediments analysed by 2 methods: analysis on detection limits and data quality 1737–1745
Dealing with outliers and censored values in multi-element geochemical data 341–352
Sequential factor analysis as a new approach to multivariate analysis of heterogeneous geochemical datasets 2233–2251
Statistical characterization of a large geochemical database and effect of sample size 1857–1874

ENERGY RESOURCES

Petroleum and natural gas

Application of Mango's light hydrocarbon parameters to petroleum from Tarim Basin, China 545–551
Characterization of paraffinic deposits in crude oil storage tanks 1974–1983
Characterization of the H isotopic composition of *n*-alkanes in terrestrial source rocks 455–464
Effects of thermal cracking of hydrocarbons on the homogenisation temperature of fluid inclusions from the Niigata oil and gas fields 255–260
Geochemical and isotopic approach to maturity/source/mixing estimations of natural gas and associated condensates 2017–2037
Geochemistry of Tertiary saline lacustrine oils, China 1875–1889
Hydrothermal bitumen generated from sedimentary organic matter of rift lakes 2343–2350
Mass transfer of H_2O between petroleum and water: implications for oilfield water sample quality 1518–1532
Origin of S-rich oils and H_2S in Tertiary lacustrine sections of the Jinxian Sag, Bohai Bay Basin 1427–1444

ENVIRONMENTAL GEOCHEMISTRY

Acid drainage reassessment of mining tailings, Black Swan mine, Kalgoorlie 661–667
Acid mine drainage in the Iberian Pyrite Belt, geochemistry, mineralogy and environmental implications 1320–1356
Assessing river–groundwater exchange in the regulated Rhone River using stable isotopes and geochemistry 701–712
Arsenate and chromate incorporation into schwertmannite 1226–1239

Arsenic (III) carbonate complexing 1218–1225
Arsenic fractionation in fine soil and influence of anions on its mobility 229–239
Arsenic in some iron-rich deposits generated by acid mine drainage 383–396
Arsenic mobility in alteration products of sulfide-rich, arsenopyrite-bearing mine wastes 2303–2314
Arsenic released to pore waters from buried mill tailings 947–959
Attenuation of Ni, Zn and Cu by secondary Fe phases from surface and ground water on mine tailings 1180–1194
Behaviour of S during diagenesis of a maritime ombrotrophic peat 1597–1605
Cadmium adsorption on hydrous Al_2O_3 529–536
Chemical and physical properties of Fe hydroxide precipitates from passively treated coal mine drainage 1445–1460
Controls on roxarsone transport in agricultural watersheds 123–133
Deciphering the presence of wastewater in a Mediterranean catchment using multitracers 1587–1596
Did an extensive forest develop on the Chinese loess Plateau during the past 130 ka? Evaluation using C isotopes 519–527
Differentiating dilution and retention processes in mine effluent remediation within a natural wetland 1241–1257
Drought induced pulses of SO_4^{2-} from a wetland: use of ^{34}S and ^{18}O to determine S sources 691–700
Effect of addition of gypsum- and lime-rich industrial products on Cd, Cu and Pb availability in acid soils 397–408
Evolution of the aqueous geochemistry of coal mine pit lakes – Massif Central, France 825–839
Fate of major constituents, Cr and other trace metals when acid waters mix with stream waters 1368–1390
Fertiliser characterisation: major, trace and rare earth elements 1473–1488
Geochemistry and mineralogy of Aegean Sea surface sediments 69–88
Geochemistry and stable isotopes of the Berkley pit lake 2116–2137
Growth and Cu accumulation by plants grown on tailings 101–107
Heavy metal distribution and accumulation in 2 *Spartina* sp. dominated macrotidal salt marshes 1195–1208
Historical backcasting of metal concentrations in the Chattahoochee River, Georgia: Population growth and environmental policy 2315–2324
Historical deposition and fluxes of Hg in a reservoir, Colorado 207–220
Hydrochemistry, mineralogy and S isotopes in acid mine drainage 789–805
Hydrological and biogeochemical dynamics of minor and trace elements in the St. Lawrence River 1391–1408
Impact of co-combustion of petroleum coke and coal on fly ash quality 1309–1319
Impact of irrigation with As rich groundwater on soils and crops 1890–1906
Impact of sulphide oxidation on dissolved metal inputs into the Lot–Garonne fluvial system 919–931
Influence of upwelling Zechstein sulphate on the concentration and isotopic signature of sedimentary sulphides in a sand aquifer 261–274

Investigation of time-dependent reactions of H^+ with variable and constant charge soils 169–178
Kinetics of element release during combined oxidation and pH_{stat} leaching of anoxic river sediments 1169–1179
Laboratory study of calcite–gypsum sludge–water interactions in a flooded tailings impoundment 973–987
Lead isotopes in tap water: implications for lead sources 353–365
Management scenarios for the Jordan River salinity crisis 2138–2153
Measurement of labile metals in acid rock drainage springs 1533–1545
Mercury and methylmercury in riparian soil, sediments, mine-waste calcines and moss from abandoned Hg mines 627–638
Mercury contamination in Maraon Lagoon, Adriatic Sea 1546–1559
Metal mobility by de-icing salt from an infiltration trench for highway runoff 1907–1919
Methane oxidation: isotope enrichment factors in freshwater boreal reservoirs 683–690
Microbial Fe(III) reduction in a minerotrophic wetland 1120–1130
Mineral quantification for wall rocks in open-pit mines 135–156
Net alkalinity and net acidity 2: Practical considerations 1941–1965
Net alkalinity and net acidity 1: Theoretical considerations 1920–1940
Nitric acid soluble fractions of 21 elements in Norwegian podzols 1258–1267
Physico-chemical parameters of water associated with bio-precipitation of hydrozincite 507–517
Possibilities of reflectance spectroscopy for assessment of contamination of urban soil 1051–1059
Radon in soil gas: identification of anomalies due to earthquakes 1106–1119
Reconstructing seawater column ^{90}Sr based on $^{210}Pb/^{226}Rn$ disequilibrium dating of mollusc shells 1965–1973
Release, transport and attenuation of metals from an old tailings impoundment 639–659
Role of "excess" CO_2 on the formation of trona deposits 2217–2232
Schwertmannite precipitated from acid mine drainage: phase transformation, sulphate release and surface properties 179–191
Selenium mobilization during a flood experiment in a contaminated wetland 569–585
Single particle characterization of size-fractionated road sediments 849–859
Sources of Sr and implications for weathering of limestone under tallgrass prairie 2325–2342
Strontium isotope systematics of base flow in Piedmont Province watersheds 1571–1586
Sulphide oxidation and natural attenuation of As and trace metals in waste from a W mine 1687–1703
Sulphur mobility in peat 673–681
The Amazon. Biogeochemistry applied to river basin management. Part 1. 1746–1829
Trace elements in streambed sediments of small subtropical streams on O'ahu, Hawai'i 2157–2188
Trace metal retention through the schwertmannite–goethite transformation 907–917

Geochemical mapping

Application of multi-element statistical analysis for regional geochemical mapping in Japan 1017–1037
Geochemical baselines for the radioelements K, U and Th in the Campania region 611–625
Interpolation and mapping of probabilities for geochemical variables 157–168

Groundwater

Arsenic and other drinking water quality issues, Muzaffargarh, Pakistan 55–68
Arsenic associations in sediments from the loess aquifer of La Pampa 989–1016
Baseline models of trace elements in major aquifers of the U.S. 1560–1570
^{36}Cl in modern groundwater dated by multi tracers: a case study in Quaternary sand aquifers 599–609
Combined use of ^{15}N, ^{18}O and ^{11}B to evaluate nitrate contamination in groundwater 1626–1636
Comparison of the Sr isotopic signatures in brines of the Canadian and Fennoscandian shields 749–766
Controls on the genesis of high F groundwaters in India 221–228
Controls on W concentration in ground water, Carson Desert, Nevada 423–441
Fluid geochemistry of the Sardinian Rift-Campidano Graben: new constraints for selection of CO_2 Storage sites 317–340
Groundwater fluxes into a submerged sinkhole area, using Rn and water chemistry 1831–1847
Groundwater in the Broken Hill region: recognising interaction with bedrock and mineralization using S, Sr and Pb isotopes 767–787
Groundwater recharge, circulation and geochemical evolution in the source region of the Blue Nile 1658–1676
Hydrochemical processes at the contact zone between anoxic groundwater and surface water in poldered floodplains 241–254
Hydrogeochemical evolution of confined groundwater in northeast Osaka Basin 295–316
Hydrogeology and chemistry of the multilayered aquifer of the Pisa Plain, Italy 41–54
Impact of variable saturated conditions on hydrogeochemical changes during artificial recharge of groundwater 1409–1426
Inorganic, isotopic and organic composition of high chloride water from wells in a coastal Californian aquifer 1496–1517
Isotope and dissolved gas evidence for N attenuation in landfill leachate in a chalk aquifer 933–945
Natural spatial and temporal variations in groundwater chemistry in fractured sedimentary rocks 861–873
Naturally occurring As: Mobilisation at a landfill 1985–2002
Near-conservative behaviour of ^{129}I in the Orange County aquifer, California 1461–1472
Origin of salinity in produced waters from the Palm Valley gas field, Australia 727–747
Potassium in shallow groundwaters in volcanic rocks, Italy 875–897
Preliminary geochemical evidence of groundwater contamination in coral islands 1848–1856
Recharge processes in karstic systems investigated through correlation of chemical and isotopic composition of rain and spring-waters 2189–2206
Stable isotope and hydrochemical monitoring of groundwater hydrodynamics in a karst aquifer 2063–2081
Use of ^{3}H in precipitation and groundwater of a catchment for describing regional flow 1292–1308
Volcanic degassing at Somma–Vesuvio inferred by chemical and isotopic signatures of groundwater 1060–1076

Organic

Occurrence and distribution of long-chain acyclic ketones in immature coals 553–568
Saturated and aromatic diterpenoids and triterpenoids in Eocene coals and mudstones from China 367–381
Thermal analysis (TG-DTA) and isotopic characterization of humic acids 537–544

Remediation

Electrokinetic iron pan generation in unconsolidated sediments: implications for contaminated land remediation and soil engineering 841–848
Municipal compost-based mixture for acid mine drainage bioremediation 1648–1657
Preliminary investigation into the use of ochre as a remedial amendment in As-contaminated soils 2207–2216

Thermal water

Hydro-geochemical and isotopic evolution of Los Aufres geothermal field, Mexico 23–39
Light hydrocarbons as redox and temperature indicators in the geothermal field of El Tatio 2049–2062
Secondary mineral-fluid equilibria in the Krafla and Námafjall geothermal systems, Iceland 1607–1625

Waste disposal (CO_2 sequestration)

Fe(III) in sediments as a novel CO_2 mineral trap 2038–2048
Monitoring of fluid-rock interaction and CO_2 storage through produced fluid sampling at a CO_2-injection enhanced oil recovery site 1131–1157

Waste disposal (nuclear)

Activation energies of the self-diffusion of HTO, $^{22}Na^{+}$ and ^{36}Cl in a highly compacted argillaceous rock 961–972
Alteration of the Callovo–Oxfordian clay from Meuse-Haute Marne underground laboratory (France) by alkaline solutions 89–99
Analysis of precipitates from reactions of hyperalkaline solutions with soluble silica 1357–1367
Aqueous alteration of nearly pure Nd-doped zirconolite 899–906
Determination of kinetic parameters and simulation of early CO_2 production from the Boom Clay kerogen under low thermal stress 2097–2107
Differences in properties and Cm(III) complexation behaviour of isolated humic and fulvic acids 1158–1168
Diffusion and retention of Na and Sr in Opalinus clay: Comparison of sorption data from diffusion and batch measurements, and geochemical calculations 2351–2363
Dissolution of high-FeO olivine rock as a function of pH 1284–1291
Distribution of trace elements in fracture fillings from "Mina Fe" U deposit by sequential leaching; implications for retention processes 487–506

Effect of chemical reactions on the hydrologic properties of fractured and rubbelized glass media 1677–1686
Effect of humic acid on the pH-dependent adsorption of Tb(III) onto geological materials 1209–1217
Effect of isosaccharinic acid and gluconic acid on retention of Eu, Am and Th by calcite 2082–2096
Fluorite (U-Th)/He thermochronology: constraints on low temperature history of Yucca Mountain 1099–1105
Hydrochemical baseline condition of groundwater at the Mizunami underground research laboratory 2283–2302
Hydrogeochemical evolution and C isotope study of groundwaters from "Mina Fe" U deposit: implications for processes in radwaste disposal 465–485
Influence of water-extractable organic matter from Opalinus Clay on soption and speciation of Ni(II), Eu(III) and Th(IV) 443–451
Kinetics of O_2 reduction by Fe(II) occurring in silicate minerals 2003–2016
Simplified method for evaluating swelling capacity of a bentonite barrier 409–422
Simulation of thermal stress influence on the Boom Clay kerogen in relation to storage of nuclear waste I. Study of generated soluble compounds 587–597
Sorption and precipitation of Co(II) in Hanford sediments and alkaline aluminate solutions 193–205
Sustainability of humic acids in the presence of MgO 1704–1713
Thermochemically induced transformations in Al-smectites: A Spanish natural analogue of the bentonite barrier behaviour in a radwaste disposal 2252–2282

Weathering

Electrochemical characterization of pyrrhotite reactivity during simulated weathering 109–121
Weathering of the Ganga alluvial plain, India: implications for fluvial geochemistry 1–21

INGERSON LECTURE

Oldest rocks, earliest life, heaviest impacts, and the Hadean–Archean transition 819–824

MINERAL RESOURCES

Exploration

Application of geochemical ratios for delineating gem-bearing areas in high grade metamorphic terrains 1489–1495
Till geochemistry in a ribbed moraine area of Finland 1714–1736

MODELLING

Conceptual Hydrochemical model of late Pleistocene aquifers at the Samario–Sitio Grande petroleum reservoir, Gulf of Mexico 1077–1098
Coupled chemistry and transport modelling of sulphidic waste rock dumps 275–293

Immobilization of U in the presence of $Fe_{0(S)}$: model development and simulation of experimental conditions 1268–1283

OTHER TOPICS

Book review

453–454
2154–2155

669
1039–1050

Preface

671–672
817

SUBJECT INDEX

Acidification of soils, time dependent reactions of ^{+}H 169
Acidity, net 1920, 1941
Acid mine/rock drainage 109, 179, 275, 383, 789, 825, 907, 919, 1226, 1320, 1533, 1687, 1920, 1941
    acidity, net 1920
        determination of 1941
    alkalinity net 1920
        determination of 1941
    analysis by anodic stripping voltammetry 1533
    fate of trace metals in 1368
    from natural springs 1533
    from smelter waste 919
    from tailings 639, 661, 973, 2116
        generating capacity of 661
    metal and SO_4 loads of 1320
    pH, comparison of field and laboratory determinations 1941
    precipitates from 179, 383, 789, 907, 919, 1320, 1533
        retention/release of As and metals by 919
    remediation with municipal compost 1648
Acid pit lakes 135, 2116
    interaction of wall rocks with 2116
    stratification of 2116
Actinides, binding to humic acid 1704
    Effect of Mg on 1704
Acyclic ketones, long chain
    in carbonaceous mudstone 553
    in coal 553
        source of 553
Adriatic Sea, Italy 1546
Aegean Sea 69
Ag
    in fertiliser 1473
    in fluvial sediment 2157
    in groundwater 1848
    in surface water 1320
Agriculture, contamination from 123, 261, 1473
Aitik mine, Norrbotten, Sweden 275
Al
    in acid mine/rock drainage 275, 789, 907, 1320, 1368, 2116
    in acid mine/rock drainage precipitates 179, 383, 789, 907, 1320
    in acid pit lake water 2116
    in coal mine drainage 1445
    in fertiliser 1473
    in gas field brine 727
    in groundwater 2283
    in mine waste pore water 2303
    in road sediment 849
    in surface water 789, 1320, 1391, 2116
        suspended particulate matter 1391
    in tailings 639
    in tailings treatment sludge 973
    in thermal water 23, 1607

release from aquifer sediment 989
release from soils on acidification 169
retention in wetland 1241
Alabama, U.S.A., 1965
Alaska, U.S.A. 627
Aliakman River, Greece 69
Alkalinity, net 1920, 1941
Almeria, Spain 2253
Am, retention by calcite 2097
Amazon Basin 1746
Analytical data
detection limits, assessment of 1737
quality, assessment of 1737
Andes, The 1746
Andra Pradesh, India 221
Anodic stripping voltammetry, for field analysis of acid rock drainage 1533
Ar
in geothermal gases 23, 1607
in groundwater 317, 933, 1060
in landfill leachate 933
in volcanic gas 1060
Argentina, La Pampa Province 989
Arizona, U.S.A. 207, 2217
Aromatic hydrocarbons
in coal 367
in mudstone 367
Artificial recharge of groundwater, chemical changes during 1409
As
attenuation/release, by mine waste 1687
complexes with carbonate 1218
contamination from poultry litter 123
geochemical map of 1017
human health problems of 55, 229, 989, 1226
in acid mine/rock drainage 383, 907, 1320, 2116
in acid mine/rock drainage precipitates 179, 383, 907, 1226, 1320
in acid pit lake water 2116
in aquifer sediment 989, 1985
release from 1985
in drinking water 55
in fault fracture filling 487
in fertiliser 1473
in fluvial sediment 1169, 2157
in fly ash 1309
in groundwater 55, 423, 465, 989, 1218, 1226, 1560, 1848, 1890, 1985
enrichment around landfill 1985
mapping of 157
near As-rich mine waste 2303
sources of 55
in marine sediment 69
in mine waste pore water 2303
in pit wall minerals 135
in poultry litter 123
in rice 1890

effect of irrigation with As-rich water on 1890
in soil 123, 1060, 1258, 1687, 1890
effect of irrigation with As-rich water on 1890
fractionation of 229
release from 1687
in surface water 1320, 2116
in tailings 639, 947
in tailings treatment sludge 973
in thermal water 23 423
in till 1714
in wheat 1890
effect of irrigation with As-rich water on 1890
mobility 229
release
from anoxic fluvial sediment 1169
from aquifer sediment 989
from mine waste 2303
from schwertmannite 1226
from tailings 947
into groundwater 55
role of organic matter in 55
sorption, by Fe oxide/hydroxide 55, 2207
for remediation of As-contaminated soil 2207
Ashphaltines, in crude oil storage tanks 1974
Äspö, Sweden 2003
Athabasca Basin, Saskatchewan, Canada 947
Au
in fertiliser 1473
in fluvial sediment 2157
in till 1714
Australia 1473
New South Wales 767
Northern Territory 727
Queensland 789
Western Australia 661
Austria 1106, 1473
Axios River, Greece 69
Aznalcóllar, Spain 1648

B
for tracing wastewater contamination 1587
in fertiliser 1473
in gas field brine 727
in groundwater 55, 317, 423, 989, 1077, 1496, 1587, 1626, 2283
in mine waste pore water 2303
in sewage treatment plant effluent 1587
in surface water 1077, 1587, 1626
in thermal water 23, 423, 1607
^{11}B
in groundwater 1626
in sewage treatment plant effluent 1626
in surface water 1626
to trace sources of NO_3 in water 1626

Ba
geochemical map of 1017

V
in acid mine/rock drainage 1320
in acid mine/rock drainage precipitates 179, 789, 1320
in fault fracture filling 487
in fertiliser 1473
in fluvial sediment 1, 2157
in fly ash 1309
in gas field brine 727
in groundwater 989
in marine sediment 69
in soil 1258
in surface water 1320, 2315
suspended particulate matter 2315
in till 341
release from aquifer sediment 989
Virginia, U.S.A. 123, 1965

W
in acid mine/rock drainage precipitates 179, 383
in fault fracture filling 487
in fertiliser 1473
in groundwater 423
in surface water 423
in thermal water 423
possible effect on human health 423
Washington State, U.S.A. 193, 1357, 1677
Washoe County, Nevada, U.S.A. 1626
Waste disposal
CO_2 sequestration 317, 1131, 2038
landfill, leachate from 933
nuclear 89, 193, 409, 443, 465, 487, 919, 1158, 1209, 1357, 1677, 1704, 2003, 2082, 2097, 2252, 2283, 2351
Waste water, contamination of surface waters 1587
Water–rock interaction 295, 465, 749, 1060, 1131, 2063
Watershed,
geochemistry of 1746
hydrograph separation in 1746
modelling geochemical and environmental behaviour in 1746
erosion in 1746
Waxes, in crude oil storage tanks 1974
Weathering
of alluvial plain sediments 1
of karst 1831
of olivine rock 1284
of pyrrhotite 109
rates of carbonates 2325
West Bengal 1890
Western Australia 661
Weyburn oilfield, Saskatchewan, Canada 1131

Xe, in groundwater 1461

Y
in acid mine/rock drainage precipitates 179
in fault fracture filling 487
in fertiliser 1473
in fluvial sediment 1, 2157

Yb
in fertiliser 1473
in fluvial sediment 2157

Yell, Shetland Islands, Scotland, U.K 1597
Yodogawa River, Japan 295
Yorkshire, England, U. K. 673
Yucca Mountain, Nevada, U.S.A. 1099, 1677

Zambezi River 1241
Zambia, Copperbelt Province 1241
Zechstein evaporites, as a source of S in groundwater 261
Zn
attenuation/release, by mine waste 1687
geochemical map of 1017
in acid mine/rock drainage 789, 907, 1320, 1368, 1533, 2116
in acid mine/rock drainage precipitates 179, 789, 907, 1320, 1533
in acid pit lake water 2116
in coal mine drainage 1445
in coal mine drainage precipitates 1445
in fault fracture filling 487
in Fe oxide/hydroxide precipitates 1180
in fertiliser 1473
in fluvial sediment 1, 1737, 2157
in fly ash 1309
in gas field brine 727
in groundwater 465, 789, 1180, 1560, 1848
in marine sediment 69
in pit wall minerals 135
in poultry litter 123
in road sediment 849
in salt marsh sediment 1195
in soil 123, 1051, 1258, 1687, 1890, 1907
release from 1687
in surface water 507, 789, 919, 1180, 1320, 1391, 2116, 2315
suspended particulate matter 1391, 2315
in tailings 639
in till 341, 1714
release from anoxic fluvial sediment 1169

Zr
in acid mine/rock drainage precipitates 179
in fluvial sediment 1, 1489
in fly ash 1309
in salt marsh sediment 1195

Zr-rich ceramics
alteration of 899
use in nuclear waste repository 899
